

Localism Notice of Proposed Rulemaking
MB Docket No. 04-233

I ask that 04-233 not be adopted.

04-233, if passed, would violate First Amendment Rights. Religious broadcasting radio stations should not be forced to take programming advice from those who have values that are different from the radio station. The radio station air time should not be open to anyone to have access to the air time rights, especially if it contradicts the values of the radio station.

Requiring an employee to be present when a radio station is on the air and restricting main studio location choices would raise costs and cause undue financial hardship for some stations.
